Education

Manipal Institute of Technology, B.Tech in Computer Science and Engineering with Specialization in AI — Bangalore, Sept 2022 – May 2026

- Courses: Generative AI, Data Mining, Neural Networks and Deep Learning, Natural Language Processing, Pattern Recognition, Machine Learning, Data Structures, Algorithms, Database Management Systems, Object-Oriented Programming, Discrete Mathematics, Probability and Statistics, Linear Algebra, Calculus, Essentials of Management, Computer vision

Experience

Airbus, Software Engineering Intern — Bangalore, India, Jan 2026 – present

- Architecting and scaling AI-Forge and CV-Forge, an enterprise no-code computer vision platform streamlining AI deployment for Airbus's Final Assembly Lines and R&D divisions.
- Added data persistance to improve UX on a pipeline based platform on CV-Forge
- Bought up the backend test coverage from 54% to 84% in 2 weeks
- Added support for events logging on CV-Forge to help the user read information a lot faster
- Integrated the new Multizone feature on CV-Forge, enabling users to create multiple zones of interest on their video feeds and get analytics for each zone separately

Segwise.ai, Software Engineering Intern — Bangalore, India, June 2025 – Dec 2025

- Architected and implemented an enterprise-grade User Access Management system with hierarchical inheritance structure, significantly enhancing security and client control.
- Created a new Subscriptions feature enabling clients to get their reports and boards on their email or slack at their desired frequency.
- Developed "Fatigue Reports" helping performance marketers identify fatiguiging creatives early on and take corrective actions.
- Created an internal tool for our customer success team to help them manage customer data and run corrective ECS tasks when required.
- Integrated Youtube and Google Display Network (GDN) data fetching for our clients helping them get analytics for these ads.
- Created a competitor tool on our dashboard helping marketers get a feed of their competitor's ads to get inspiration for their next campaigns.
- Maintaining backend servers written in Golang and Python
- Handling deployments on AWS Fargate with end-to-end responsibility for features

Andwemet, Software Development and Machine Learning Engineering Intern — Bangalore, India, Apr 2024 – Oct 2024

- Rebuilt the entire onboarding process, making it 3x faster than the previous one.
- Created an ML recommendation engine to help 400+ people find matches only using google sheets
- Part of the React Native Expo app team to make the app more accessible
- Built the community feature for the users to interact with each other to add another dimension to dating
- Integrated the backend (node) with the frontend (Expo React-Native).

- Built an admin dashboard to manage the posts and verify users using retool

Footloose Labs, Robotics Intern — Bangalore, India
May 2024 – July 2024

- Building Nandi, an Autonomous Mobile Robot (AMR), used for hospital intralogistics
- Increases the efficiency and uptime of hospital intralogistics by 150%
- Worked on the project to control the local swarm using an Elastic Compute Cloud (EC2) instance
- Used REST APIs, Flask, Node, Linux, AWS Elastic Compute Cloud (EC2)

Wellfyn, Backend Developer Intern — Bangalore, India
May 2023 – July 2023

- Increased Developer productivity by 2x by creating docs and OpenAPI Spec 3 for the APIs I developed
- Used Golang and Gin to build REST APIs
- Clean architecture to make the code scalable and readable. (used Repos, Usecases and Controllers)
- Used Testing frameworks like mockery and testify

Cledge.org, Software Development Engineering Intern — Remote, Seattle, WA
Apr 2021 – Dec 2022

- Picked up by Microsoft for Startups
- Worked in Agile environment
- built custom backend to reduce the content upload time by 70%

Leadership Experience

Head @ Hack Solstice — May 2023

- Organized the largest hackathon of college
- Directly managed 9 sponsors including Schneider Electric, Devfolio, Soloana, Replit and many more
- Received more than 750 applications
- Gained a Hackathon rating of 3.9 on devfolio.
- built the Hack Solstice website using Next.js and Tailwind

IT Head @ Falak, MIT Bengaluru — May 2023

- Created the fest website in 2 weeks
- Streamlined concert pass verification using QR codes on phone
- Built and maintained the backend, payments and business data
- Built the Falak website using Next.js and Firebase

Head, OpenSource @ CodeX, MITBLR — May 2023

- Largest club of college with 900+ members
- Conducted multiple workshops and competitions to help the community

Projects

Signo — Devfolio project page

- Helps dumb and deaf people communicate on video call by translating ASL to plain English and displaying it as subtitles in their video stream
- Tools Used: Python + Tensorflow + Keras + Mediapipe + kivy + opencv
- Achievements: Came 2nd in JIT Hacks, Bangalore

Diarama — diarama.ink

- Generate diagrams with AI
- Tools Used: Node + Gemini + NextJS + MongoDB + Tailwind
- Built for a video series Weekend builds: ep 1
- Currently building in public

Turse — Devfolio project page

- The first learning platform that uses youtube as a content library and empowers users to create courses using youtube videos
- Won one of the biggest hackathons in India, Hack-a-nova
- Got recognition from the largest student community in India, BlueLearn
- Currently in alpha stage
- Built using NextJS, Firebase, MySQL, Prisma, and Railway.

Freelance projects

- ICRAFMN 2024: built for Manipal University Jaipur | Svelte + Tailwind
- Flashbakc: built for Flashbakc | Vite + React, Supabase, Tailwind
- Yoga With Manu | Next.js + Tailwind
- MAHE BLR MUN built for MAHE BLR

Technologies

Languages: Python, JavaScript, TypeScript, Dart, Golang, Java

Web and Mobile Frameworks: React, Svelte, NextJS, Flutter, React-Native, Android Studio

Cloud / Devops: Linux, Vercel, Amazon Web Services (AWS), Google Cloud Platform (GCP), Docker, Git, Github

Databases: MySQL, Postgres, MongoDB, Firebase (Firestore), Supabase, SQLite

Tools: NodeJS, Flask, Gin (Golang)

BAAS / PaaS: Firebase, Supabase, Vercel, Heroku
